

Subject: Generation 2 to Generation 4 Selector Valve Motor Migration

Date: 01/30/24

Region: Global

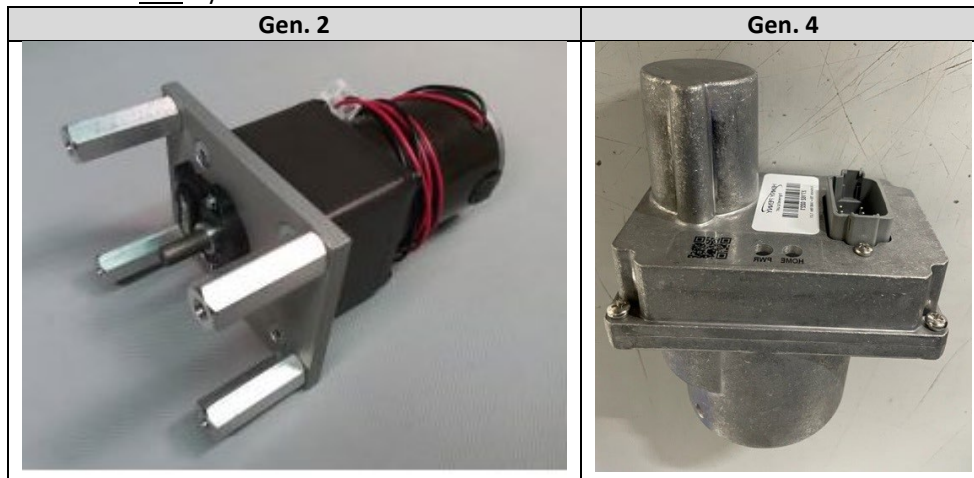

Model Affected: This technical bulletin applies to **LVG** model fryers only. **Note:** Other model fryers have already migrated, and additional models of fryers will migrate in the future.

Summary

As part of Henny Penny's continuous improvement effort, we are migrating away from the Generation (Gen.) 2 selector valve motor, and migrating to the Gen. 4 selector valve motors on **LVG** fryers.

- New fryers S/N BU2401002 and after, are migrating to the new Gen. 4 selector valve motor from our factory.
- Older fryers S/N BU2401001 and before, should use the new **Gen. 4 selector valve motor kit** listed below.

IMPORTANT: Upgrade kit **140776**, should be used as a serviceable part for all existing Gen. 2 selector valve motors on **LVG** fryers.

Part Numbers

IMPORTANT: Service kit **140776** contains all the parts needed for the Gen. 2 to Gen. 4 motor upgrade on a **LVG** fryer. You will need to buy the kit to successfully complete the upgrade.

Part #	Description	Stocking Level	Quantity
140776	Encoder emulator motor service kit	B	1
- 183173-001	Encoder emulator cable only		1
- FM08-923A	Installation Documentation		1

Warranty

The service kit includes a 90-day parts warranty from the date of install.
